

INTERMEDIA®

# Intermedia's Email Archiving

Preserve information, facilitate compliance, and speed eDiscovery with a service that's fast, scalable and secure.

100% capture of inbound and outbound emails

Simple to search, filter, tag and recover

Unlimited storage with no user limits

Powerful admin features via HostPilot®

Free 24/7 phone support

**Virtually every company needs to preserve email from loss or alteration.** That's because employees can accidentally or maliciously alter or delete critical emails. Also, many businesses find themselves involved in litigation, and emails that are not stored in a tamper-proof archive may be inadmissible as evidence.

Regulated businesses—including financial, healthcare, insurance, retail, and other industries—are required to archive email by a variety of compliance mandates. The incremental cost of inadequate email archiving can quickly escalate.

## PROTECT INTELLECTUAL PROPERTY

Can you ensure that your company's intellectual property and critical information is preserved and retrievable within seconds, even if someone accidentally or maliciously deletes dozens of emails?

## SPEED EDISCOVERY

Can you comply with federal, state and foreign rules and laws to deliver all relevant emails within a short window to prevent a fine, without paying hundreds of dollars per gigabyte for an eDiscovery service?

## FACILITATE COMPLIANCE

Are you regulated by PCI, SEC, GLBA, HIPAA, HITECH, SOX, or other agencies and guidelines? Are you at risk of failing an audit or accidentally exposing a customer's credit card data to potential theft?

Intermedia's Email Archiving service is pre-integrated with our Exchange Email service.

# HOW EMAIL ARCHIVING HELPS PRESERVE, PROTECT, AND RECOVER YOUR EMAIL.

## It's scalable

Even smaller firms can often generate millions of emails. Scalable Email Archiving means paying only for the mailboxes you need as you grow.

- Replicated via eight datacenter copies
- 100% capture across all devices
- Includes Exchange, IMAP and POP
- Unlimited storage capacity and linear scalability
- Full indexing and extraction of 500+ file types (attachments)
- Fast data ingestion and searching across millions of emails

## It's secure

The keys to compliance and eDiscovery mandates are record authenticity and preservation. Email archiving protects from loss, corruption, damage or misuse.

- FIPS-certified AES 256-bit encryption of stored data
- Data is encrypted both in transit and at rest
- WORM-compliant tamper-proof media
- FINRA-compliant per SEC 17.a-4 requirements
- No comingling of data—data is stored in individual customer silos to prevent corruption

## It's searchable

Email Archiving ensures your messages are available to quickly search, identify, and recover.

- 3 different search methods + advanced full-text indexing
- Identify content with tagging tools & search inside attachments
- Implement legal or compliance holds
- Categorize results before exporting
- Recover messages back to administrator's mailbox in seconds
- Quickly search across millions of emails in every mailbox in your account

## It's easy to set up and use

For both users and administrators, Intermedia's Email Archiving offers an easy-to-use integrated experience.

- Access admin and searching features via HostPilot
- Grant different levels of accessibility and permissions
- No hardware or software licenses to buy
- Build reports based on archive activity
- Keep records immutably stored regardless of any attempts to alter or delete them
- Extend end-user archive access through our online portal

**J.D. POWER**

**2018**
